

ONE WORLD LED

PRODUCT CATALOGUE

ABOUT US

Our company is best known for extensive innovation, design & manufacturing capabilities since 2004. When necessary, customizability has been and continues to be our strongpoint.

After years of research, development, manufacturing & distribution, we have a firsthand understanding of each market segment, and have tailor made yet versatile & economic single cabinet products for each industry.

The benefits of using One World LED products are vast. Single cabinet product designs make for straight forward installations & simplified servicing.

If your requirements exceed these products, a custom LED screen may be what is right for you. Please contact us for any custom LED inquiries, and our team will work with you to develop the best fitted product for your needs.

ADVERPOST SOFTWARE

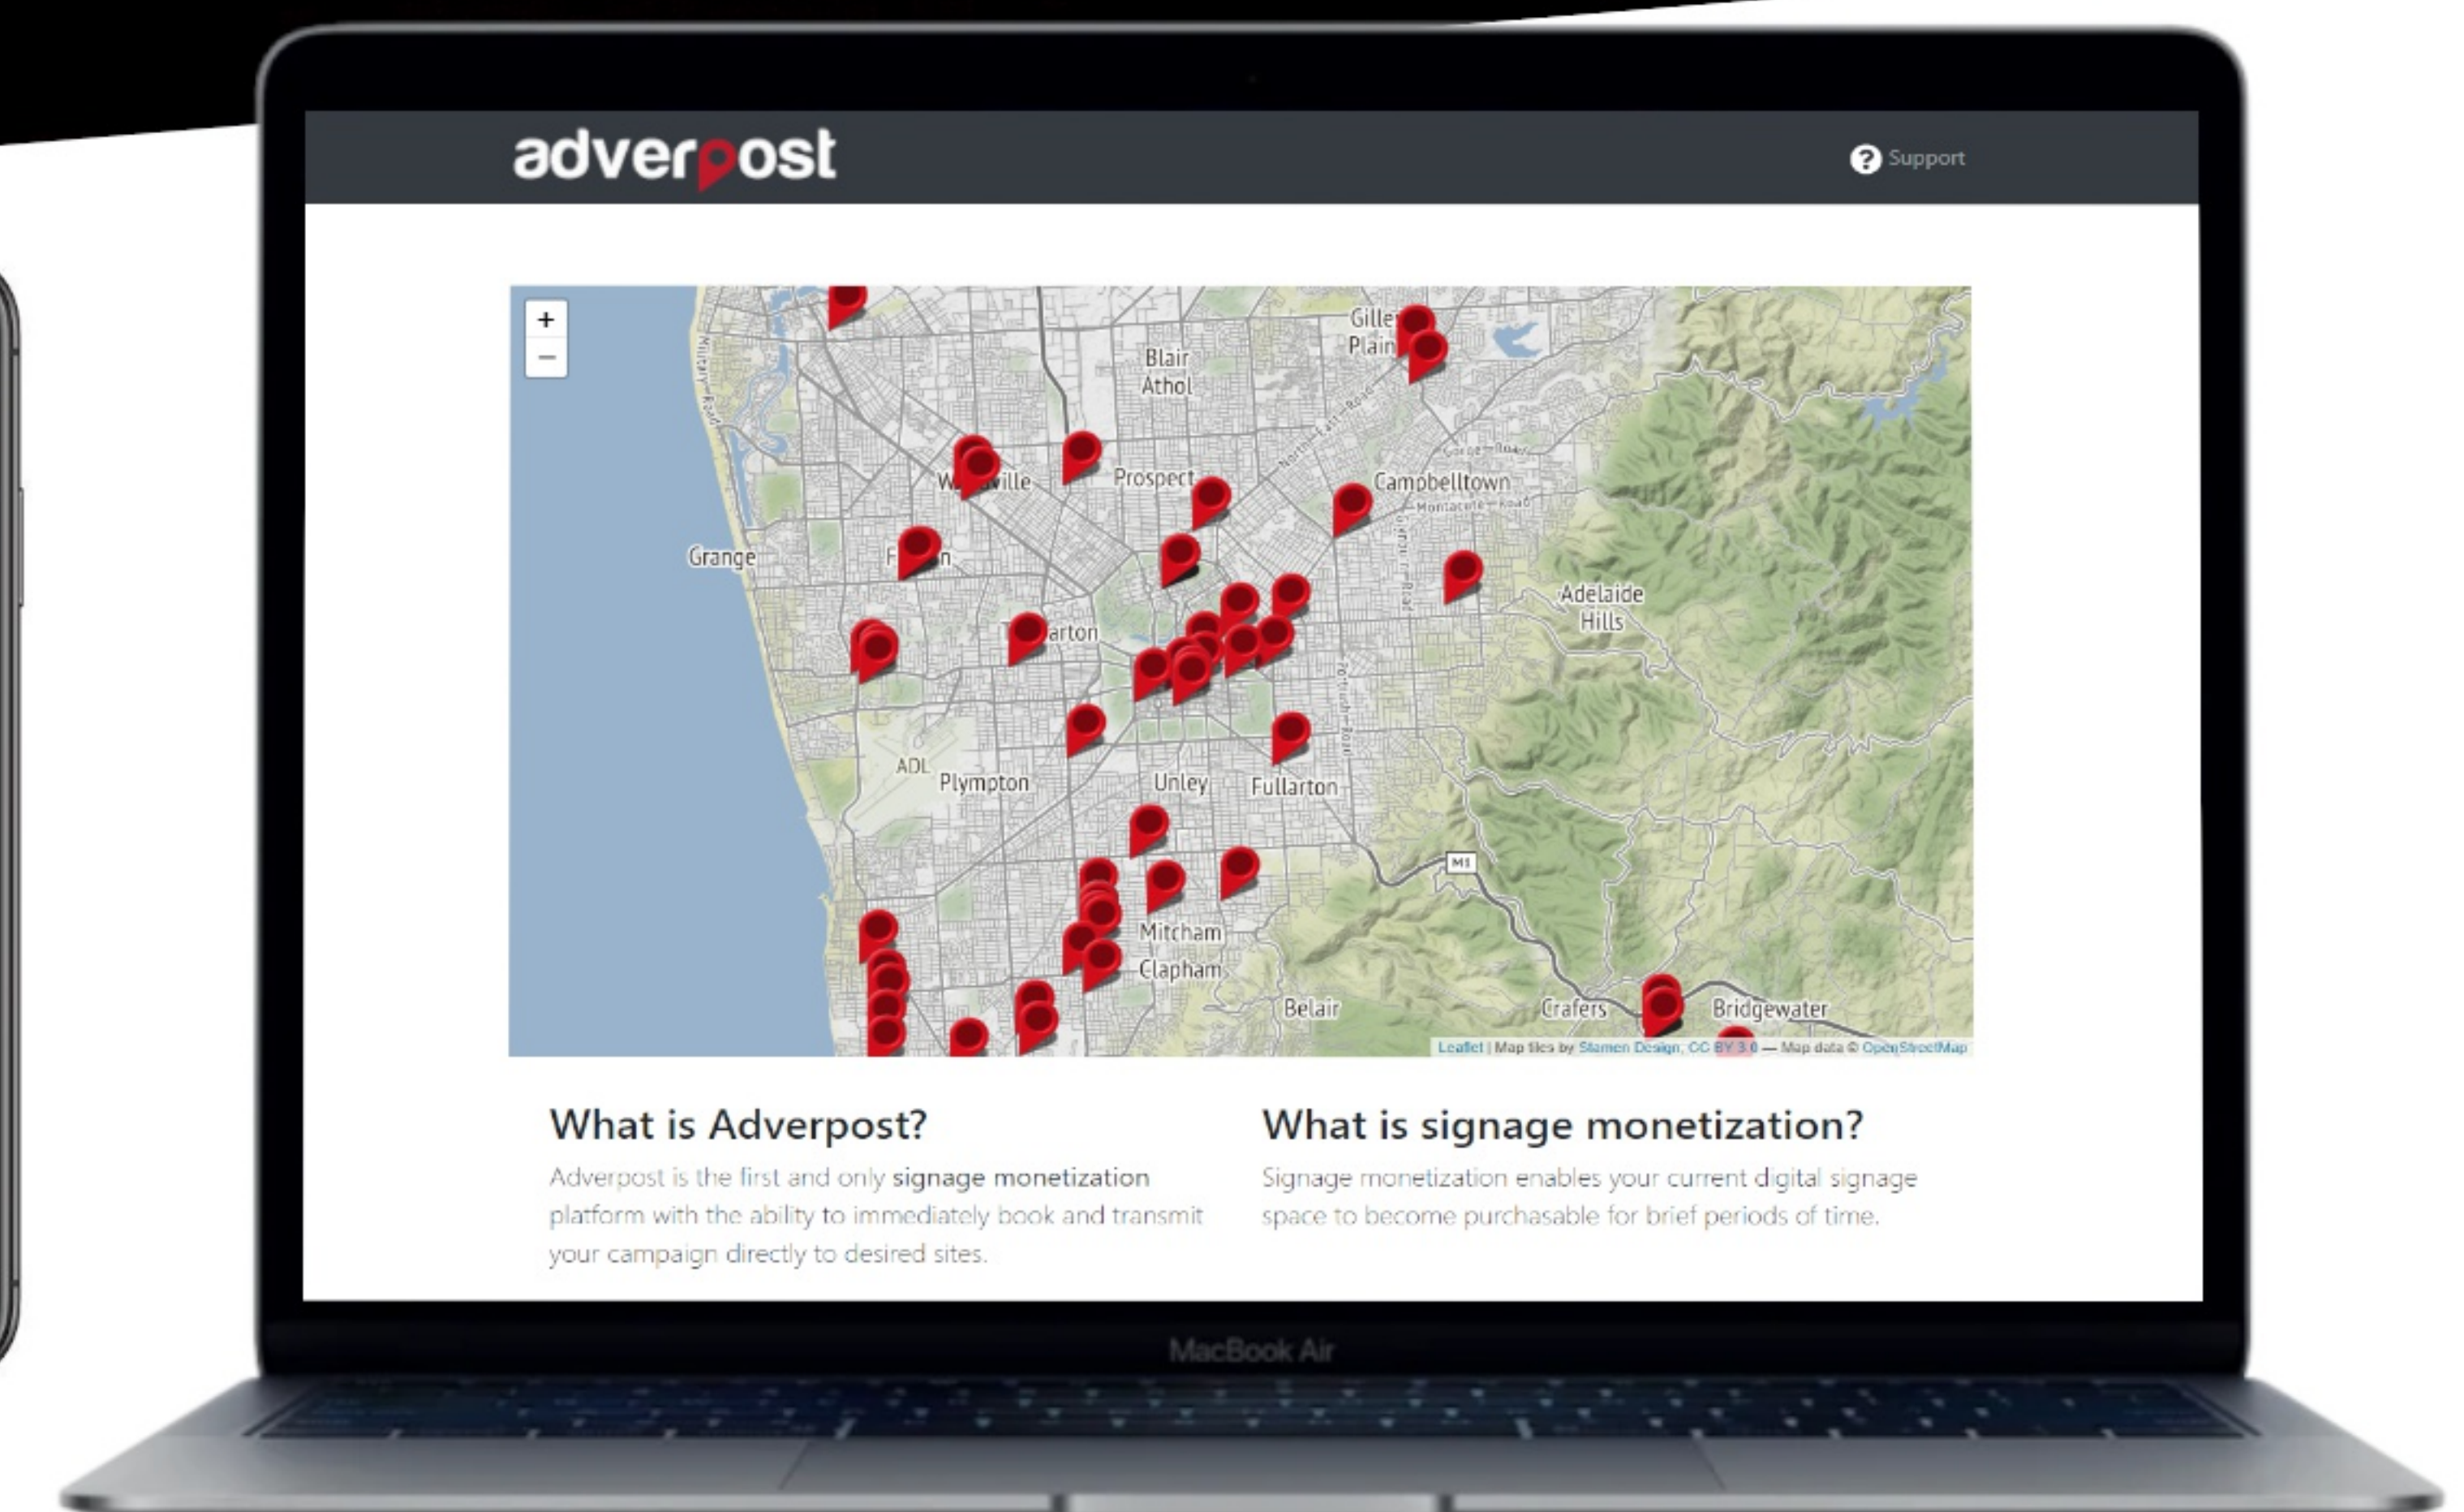

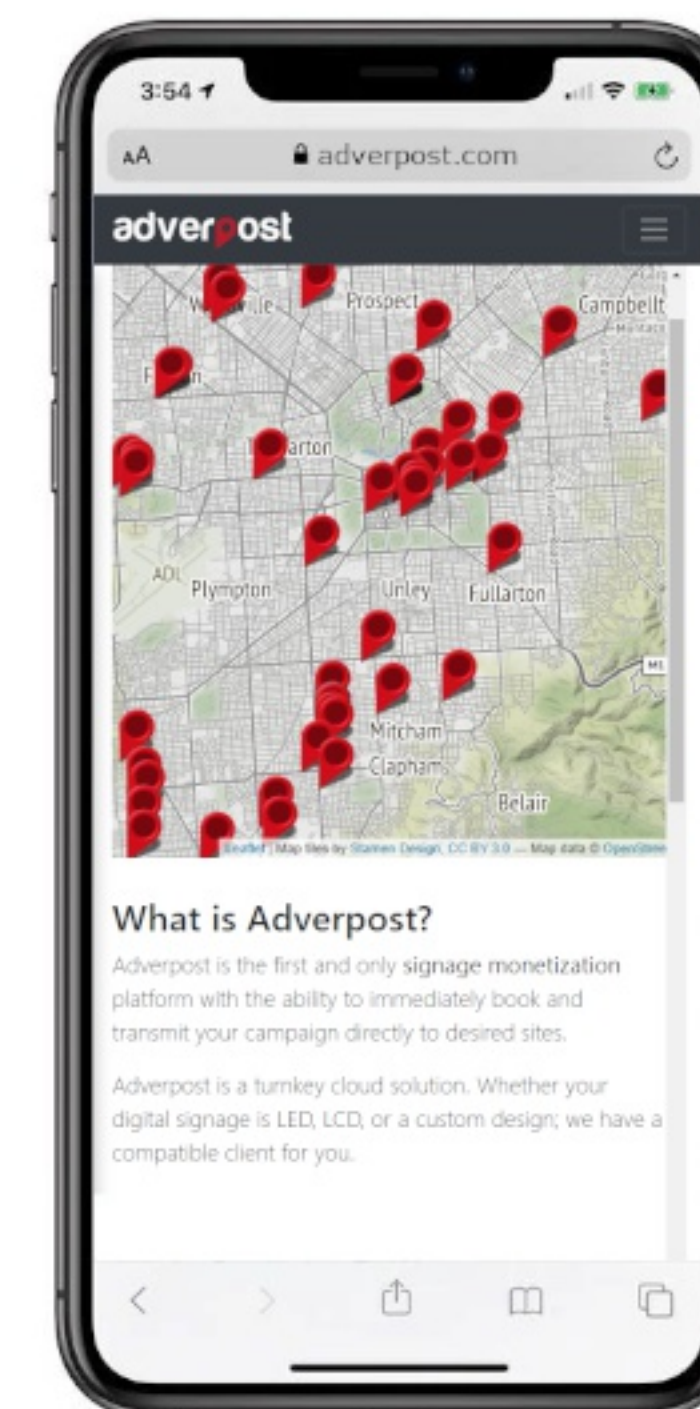

Features & Benefits

Screen owners are able to sell screen time by listing their screens publicly.

Upload & manage content any time anywhere with internet access.

Control & schedule the brightness of any screen remotely.

Developed for revenue generation.

E2V SOFTWARE

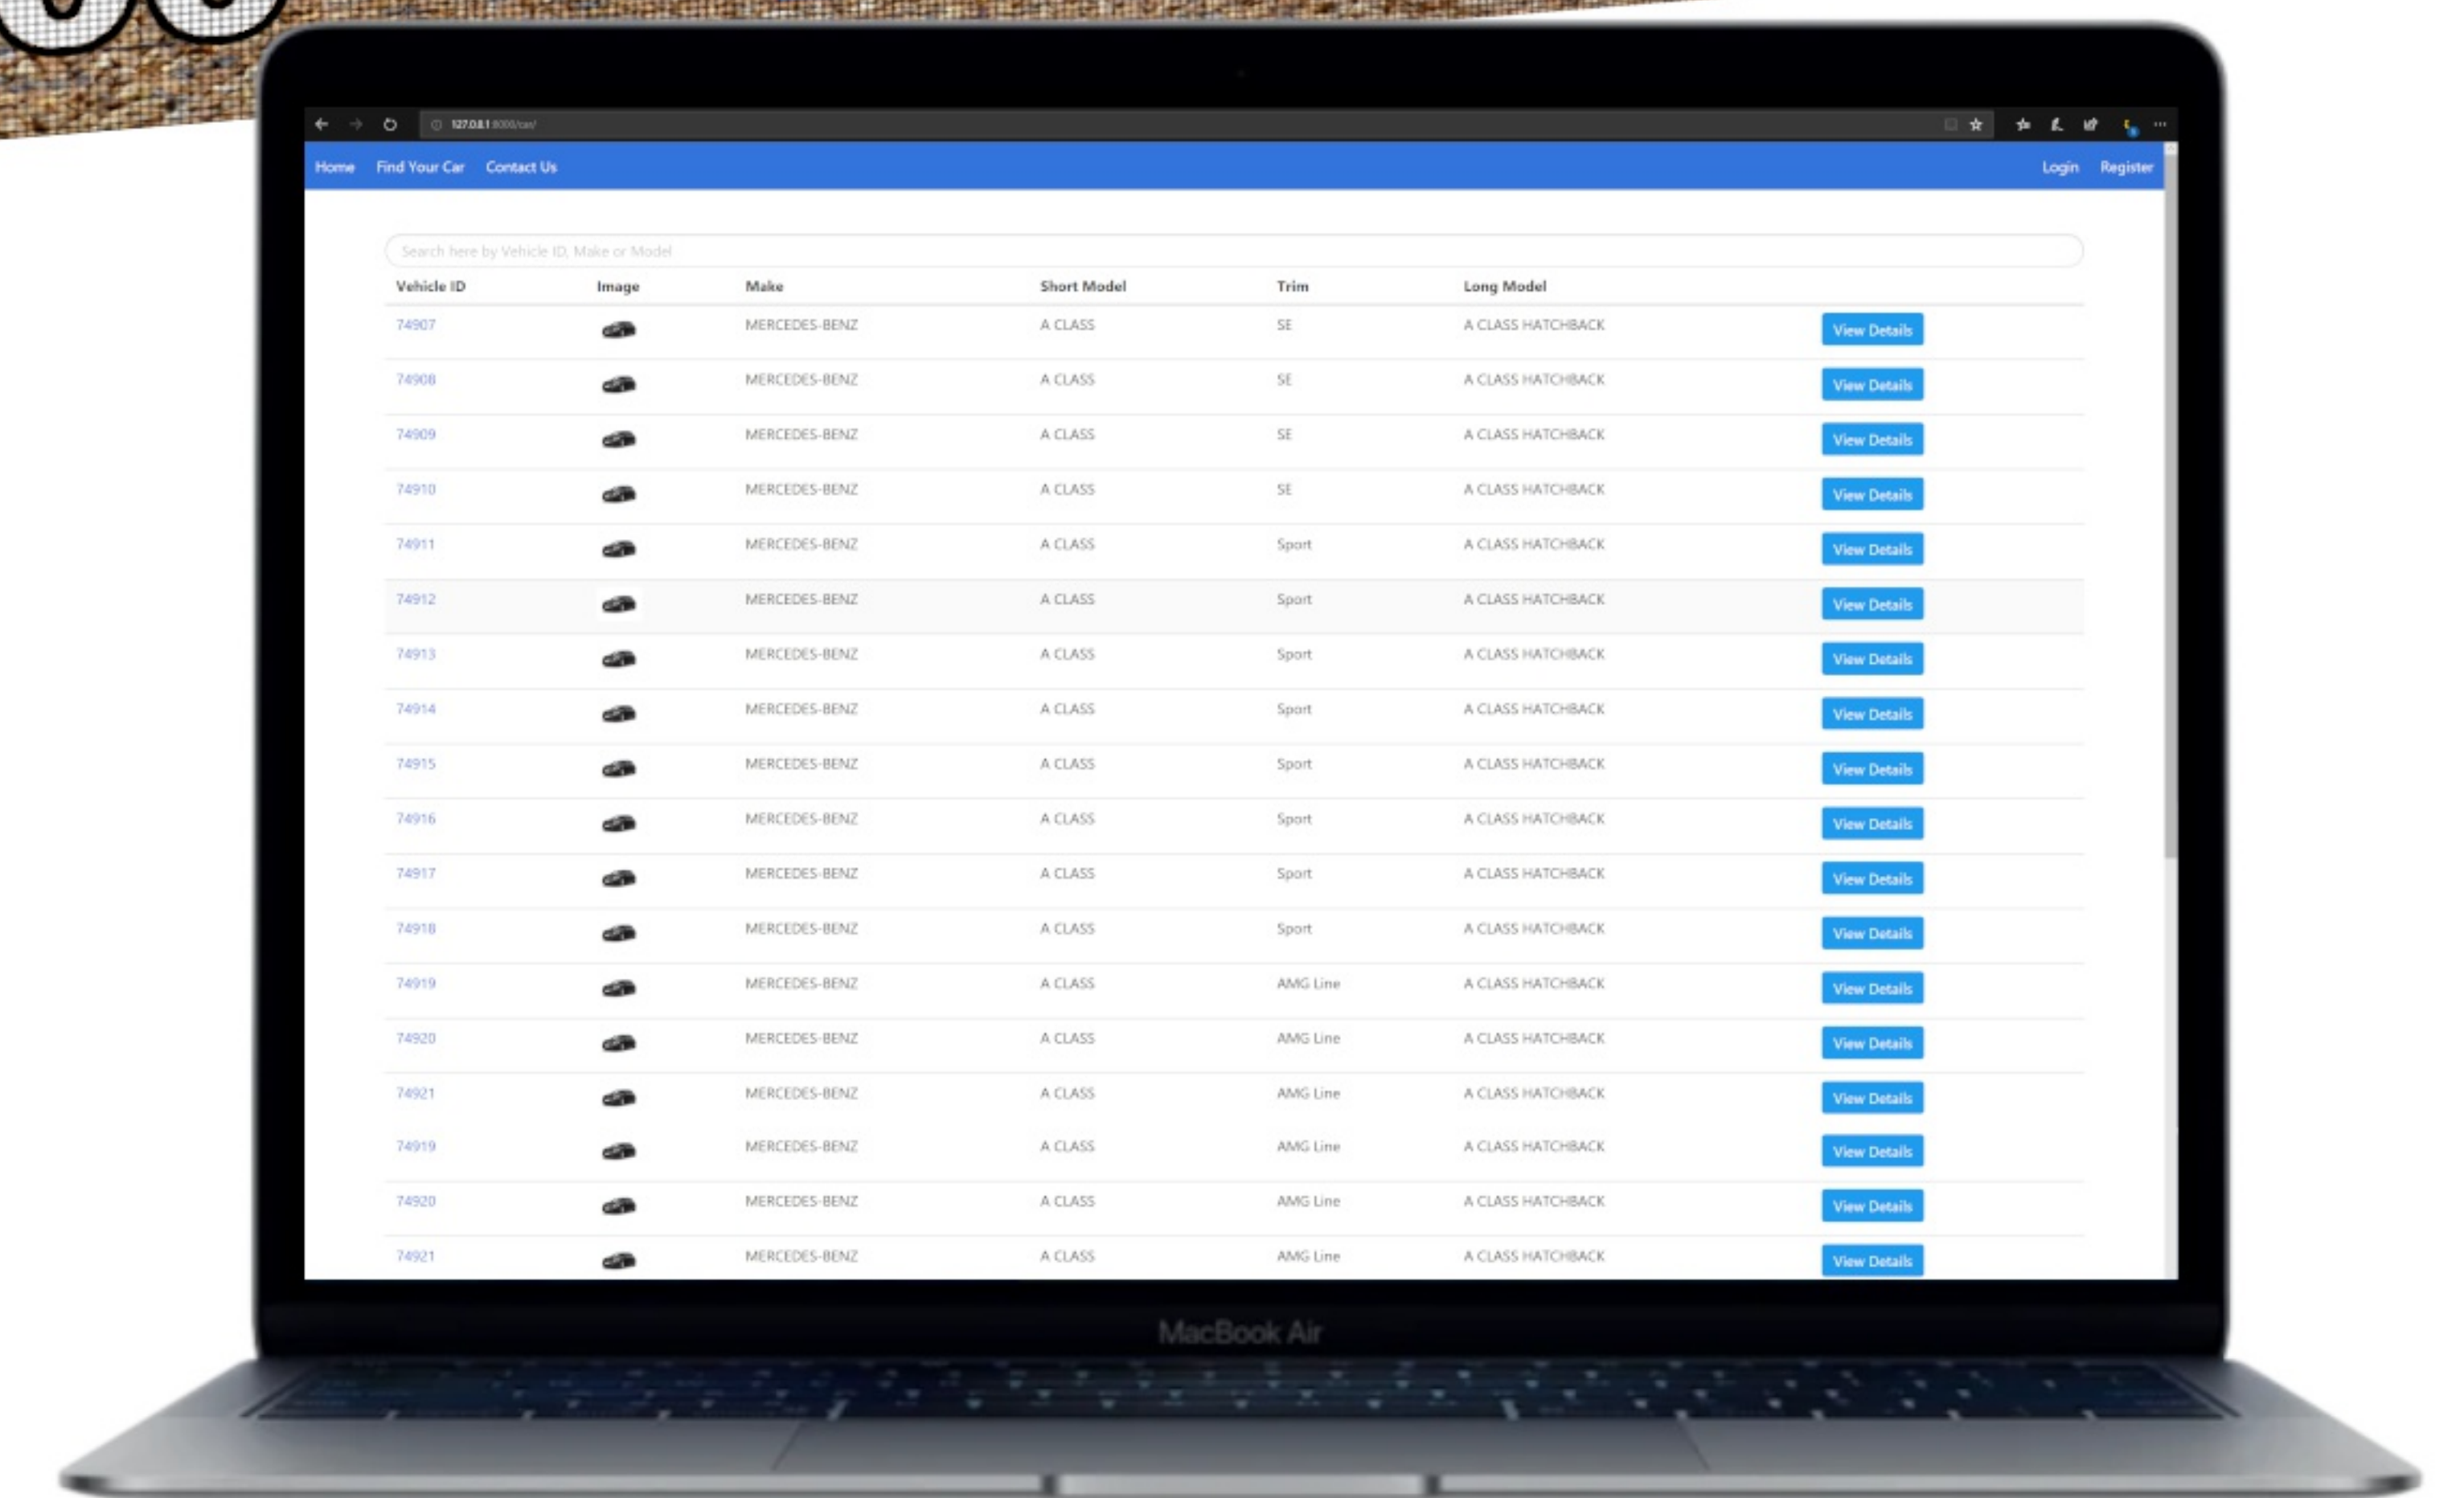

Features & Benefits

Extract data from any selected inventory in real time to display on any screen.

No need to create any content. This software creates content based on preferred fields of data.

When items are added to the inventory system they're autonomously added to the screen's loop and vice versa when items are removed.

Perfect for any LED screen in a retail space.

SPORTAL

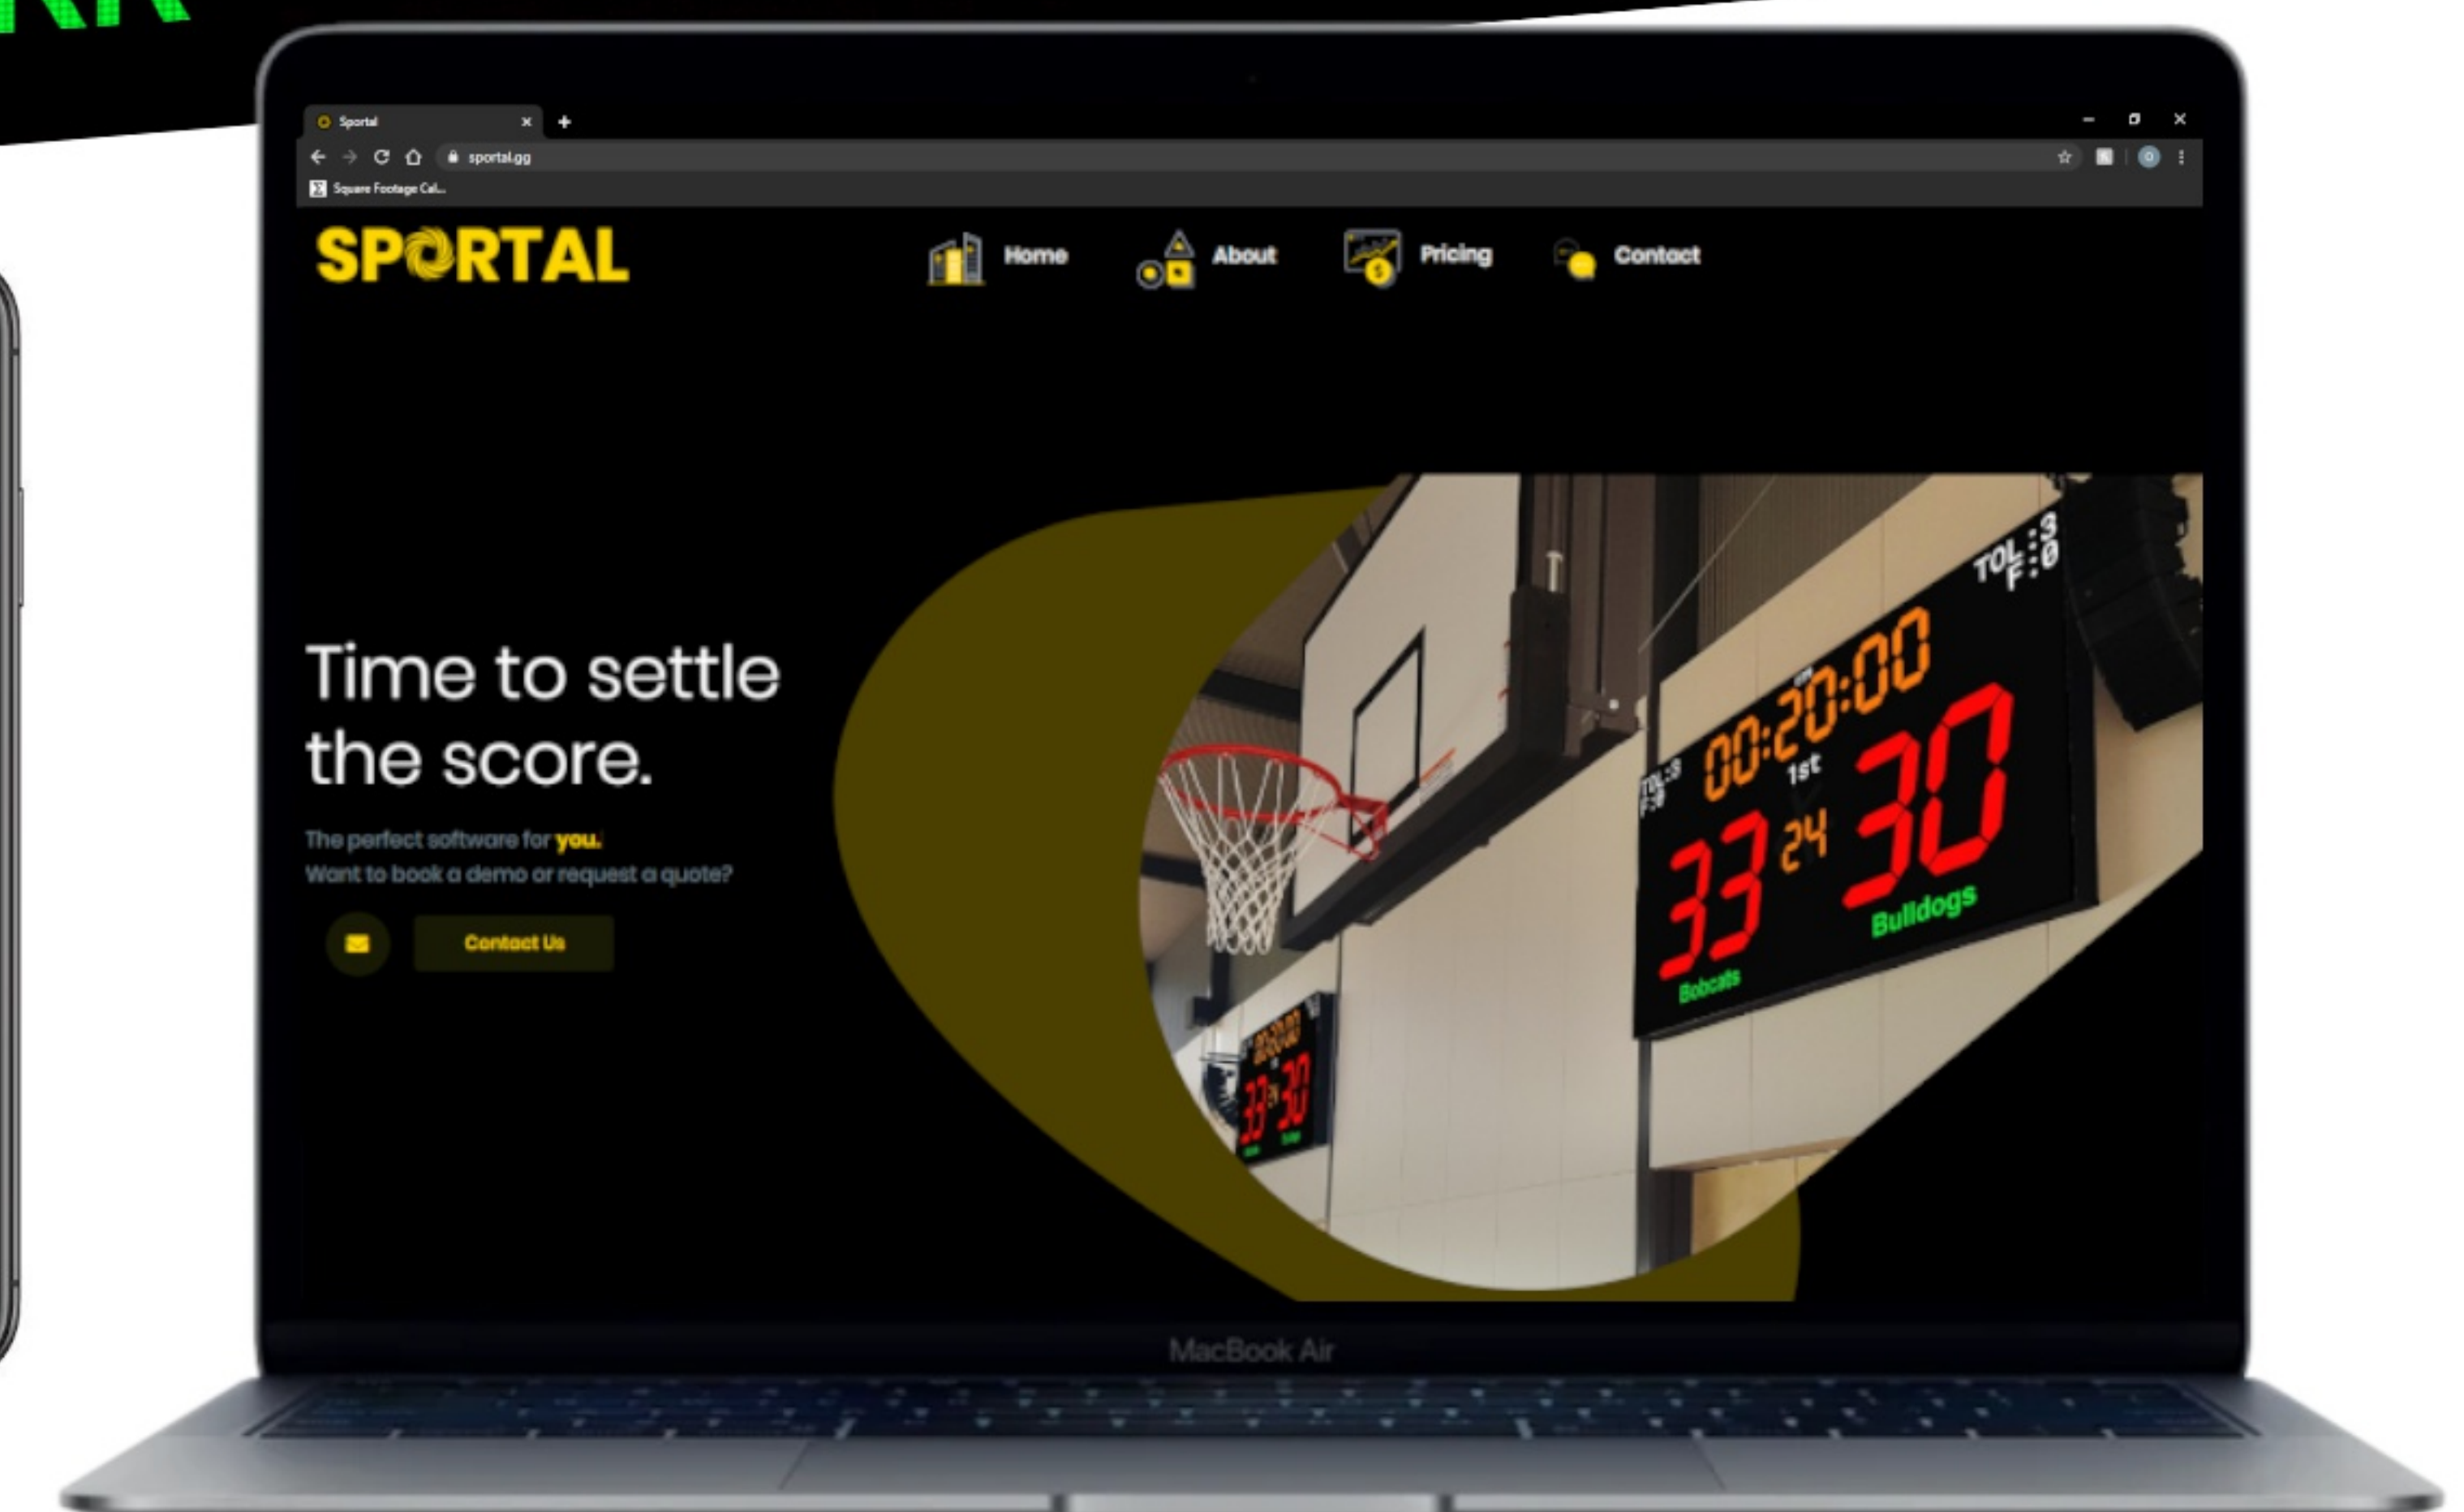

Features & Benefits

Control the scoreboard from any device (smartphone, tablet or PC).

Choose between a wide selection of sports. Toggle advanced options for competitive games, or keep it simple for social matches.

Save game data automatically for statistical purposes. Export game history on your website. For more information visit www.sportal.gg

Designed for any scoreboard LED screen.

IP PORTFOLIO

Importance of Intellectual Property

Intellectual property should be at the forefront of any professional decision involving LED.

One World LED have developed hardware, software & device patents to protect all products & services offered in this document.
